Reference letter

For whom it may concerns

We, AlbaPetrol, are a petroleum supplier in Kosovo. We operate petrol stations and supply commercial customers in Kosovo with various fuels.

We are pleased to confirm that we are using the FEROX product from Rennsli Corporation dissolved in our Diesel performance fuel. After an intensive test phase, we started in summer 2025.

Our customers at the pump, both private and commercial customers, are enthusiastic about the results of our FEROX-enhanced fuel and confirm the following advantages:

- Significant increase in range of approximately 20%
- Fuel savings of approximately 20%
- Quiet engine run and good torque/acceleration
- Clean engines and virtually no visible emissions

This allows us to offer our customers affordable fuel that performs significantly better than any other performance fuel we have encountered so far!

Our customers and the environment benefit from noticeable savings in fuel costs and significant improvements in smog emissions.
